

Objection Handling - Calibrate Media

“This is too expensive”

Response: Understood. We can reduce scope to the highest-impact workflow first and phase the rest.

“We need to think about it”

Response: Makes sense. What specific concern should we resolve first: scope, timeline, or budget?

“We can do this in-house”

Response: You probably can. The value here is speed, structure, and clean implementation without distracting your team.

“Now is not the right time”

Response: Fair. What milestone or date would make this a priority so we can plan around it now?
